

Project Design Phase-II

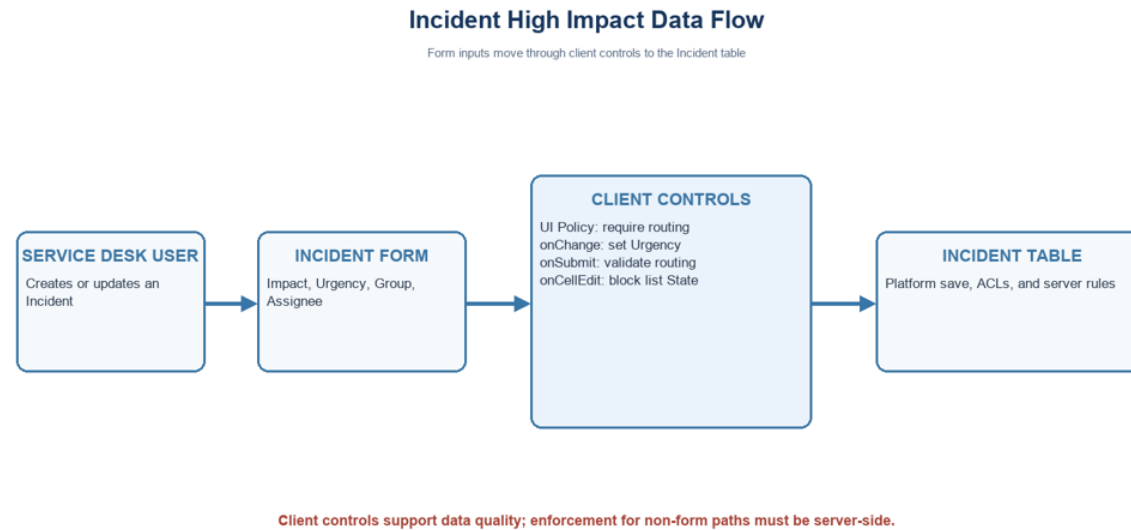

Data Flow Diagram & User Stories

Date	30 September 2026
Team ID	SWTID-2026-8886
Project Name	Implement Client Script and UI Policy for Incident
Maximum Marks	4 Marks

Data Flow Diagrams:

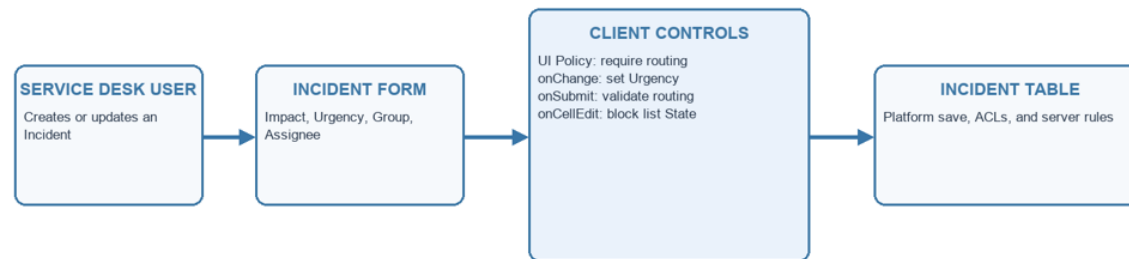

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: (Simplified)

Incident High Impact Data Flow

Form inputs move through client controls to the Incident table

Client controls support data quality; enforcement for non-form paths must be server-side.

High Impact Incident Form

Conceptual illustration - not a screenshot from a live Serviceflow instance

INCIDENT | HIGH IMPACT TRIAGE

Impact

1 - High

Urgency

1 - High [read only]

Assignment group

Required

Assigned to

Required

State

Change from the record form

If group or assignee is missing at High Impact, save is blocked with a field message.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Service desk agent	High impact	USN-1	As an agent, require Assignment group and Assigned to when Impact is High.	Both fields mandatory at Impact=1.	High	Sprint-1
Service desk agent	Urgency	USN-2	As an agent, set Urgency High when I set Impact High.	Urgency changes to value 1 once.	High	Sprint-1
Service desk agent	Save validation	USN-3	As an agent, explain missing routing before saving.	Save blocked with message on missing group.	High	Sprint-1
Service desk agent	Save validation	USN-4	As an agent, explain missing assignee before saving.	Save blocked with message on missing assignee.	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Incident manager	Policy reversal	USN-5	As a manager, reverse the controls when Impact is reduced.	Mandatory/read-only effects reverse.	High	Sprint-1
Service desk lead	List workflow	USN-6	As a lead, prevent State list edits in the demo.	List edit rejected with guidance.	Medium	Sprint-2
Service desk agent	Form workflow	USN-7	As an agent, update State from the record form.	Form update follows platform rules.	Medium	Sprint-2
Project tester	UAT	USN-8	As a tester, run a repeatable set of checks.	8 scenarios recorded with outcomes.	High	Sprint-2
Platform admin	Compatibility	USN-9	As an admin, confirm fields and values before activation.	Field and choice checks documented.	High	Sprint-1
Platform admin	Security	USN-10	As an admin, keep server-side enforcement authoritative.	Limitations and extension documented.	High	Sprint-2
Project reviewer	Documentation	USN-11	As a reviewer, see the target configuration.	Policy and scripts listed.	Medium	Sprint-2
Project reviewer	Handoff	USN-12	As a reviewer, confirm rollback and ownership.	Deactivation steps and sign-off captured.	Medium	Sprint-2

Project note: values use the standard Incident choices where Impact 1 and Urgency 1 represent High. Confirm field names and values in the target instance.
