

Project Design Phase

Proposed Solution Template

Date	30 September 2026
Team ID	SWTID-2026-8886
Project Name	Implement Client Script and UI Policy for Incident
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem statement	High-impact incidents may be incomplete or inconsistent at triage.
2	Idea / solution	Use one UI Policy and three Client Scripts for clear form and list behavior.
3	Novelty / uniqueness	Combines conditional field behavior, auto urgency, save validation, and list workflow in a small native-platform demo.
4	Customer satisfaction	Clear requirements and immediate feedback reduce avoidable rework; validate with agents.
5	Business model	Internal service quality improvement; no direct revenue model.
6	Scalability	Reuse native Incident controls; add server-side rules if the policy must cover non-form paths.

High Impact Incident Form

Conceptual illustration - not a screenshot from a live ServiceNow instance

INCIDENT | HIGH IMPACT TRIAGE

Impact

1 - High

Urgency

1 - High [read only]

Assignment group

Required

Assigned to

Required

State

Change from the record form

If group or assignee is missing at High Impact, save is blocked with a field message.

Proposed ServiceNow solution

Project note: values use the standard Incident choices where Impact 1 and Urgency 1 represent High. Confirm field names and values in the target instance.
